

## Exostar Vendor Qualification Manager

**Qualifying and onboarding new vendors is vital to supply chain management. Exostar Vendor Qualification Manager (E-VQM) helps you do it consistently and efficiently. Collect, maintain, and manage supplier information to set up approved vendors within your buying organization.**

### Why E-VQM?

- Consistent, standardized data management for suppliers of all sizes
- Automated onboarding that reduces time, cost, and errors in the supplier management process
- Fast implementation and time to value through SaaS deployment

*Security.  
Efficiency.  
Compliance.  
Peace of Mind.*

### Business Challenges

Large A&D businesses need to collect and validate vendor information consistently, regardless of the type or size of the vendor organization. They need to:

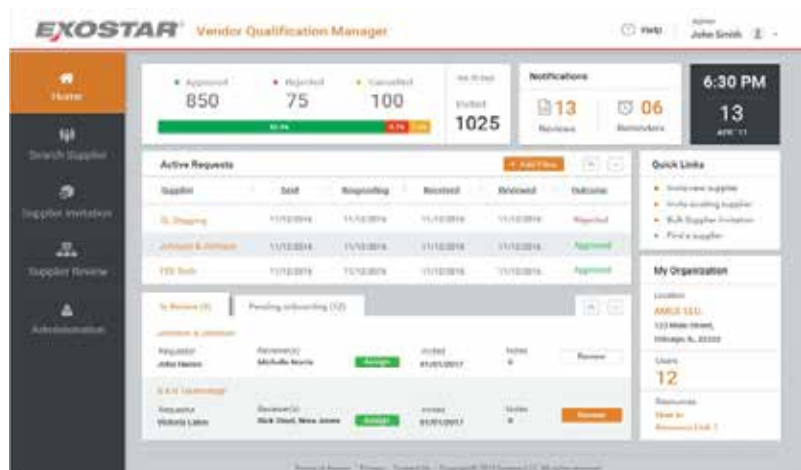

- Apply corporate policies throughout the vendor qualification process, without long delays.
- Standardize data captured from vendors by using a single system.
- Reduce the time it takes to qualify a vendor without jeopardizing accuracy or increasing risk.
- Onboard new vendors quickly to reduce projects' critical paths.

### Solution

E-VQM is a key component of the Exostar supplier management solution suite for collecting, maintaining, and managing supplier information. It allows A&D businesses to accurately and securely add new approved suppliers.

Because it makes data gathering more convenient, E-VQM speeds up the supplier onboarding process. It also reduces the costs of approval and certification.

In addition, approved vendors can be provisioned seamlessly to the Exostar Partner Information Manager (PIM) service and the buyer's ERP systems to complete the onboarding process.

## Key Features

- **Vendor Invitations:** A simple process to invite individual or batches of suppliers to prequalify them.
- **Customized Qualification Forms:** Custom forms collect both “core/common” and customized data from prospective vendors.
- **Convenient Vendor Access:** Simple web forms reduce collection and approval timelines.
- **Approval Workflows:** Subject matter experts approve their sections of the vendor data.
- **Real-Time Reporting:** Automated reminders, alerts, and status of vendors.
- **DFAR Security Compliance:** Secure Authentication (2FA) and access control.

## The Exostar Difference

- An existing A&D vendor database, including a global network of 125,000 organizations. This common vendor database allows for sharing and reuse of data in the partner network (your partners likely already belong).
- Exostar is the industry leader in secure supply chain optimization, with 12 years of proven experience.
- Seamless integration with Exostar Partner Information Manager and Supply Chain applications, for end-to-end supplier management.
- First-level application support by US-based product experts.
- Optional validation of vendor information (example: D&B)

## Supported Environments

- **Exostar E-VQM** is a cross-enterprise solution that is designed to integrate with most supply chain ERP infrastructures.
- **Modern application support** for Java™, .Net, SOAP and REST

## Related Solutions

- **Exostar Supply Chain Collaboration and Management** solutions improve your order response and fulfillment cycle times. They save you time and money without sacrificing security or visibility—from sourcing to procurement and order to payment.
- **Exostar Partner Information Manager** provides organizations the ability to manage risk by understanding the strengths and vulnerabilities of their partners.
- **Exostar Managed Access Gateway** provides organizations proven, trusted ways to improve management and provide visibility into employee, contractor, and partner identities and access privileges.
- **Exostar SecureForms** provides secure and compliant sharing of business sensitive information, internally and externally.
- Optional services for vendor adoption and education.
